

## **Synteko Floor Care Products Will Help to Keep Your Floors Looking Beautiful!**

Synteko is a range of high quality wood floor finishes and floor care products. Originally developed and manufactured in Sweden the Synteko Brand is owned by Akzo Nobel the largest paint manufacturer in the world.

The Synteko brand is famous worldwide based on its tradition of success of developing high quality products and the commitment in providing outstanding services.

### **Floor Care Tips!**

Synteko has some tips on how to keep your floor looking brand new.

Great care should be taken in the type of product used to clean a hardwood or laminated floor. Cleaners or detergents not designed for floors may contain harsh chemicals that can make floors lose their gloss and beauty.

Synteko floor care products were specifically developed to keep hardwood and laminated floors looking like new.

### **Synteko Heavy Duty Soap**

A heavy duty basic cleaner that efficiently removes grease, dirt, soil, and old coats of polish from hardwood floors. It should be used prior to the application of Synteko Newshine, Natural, or before sanding and recoating with Synteko floor finishes.

1. Keep floor surface clean. Vacuum or sweep the floor regularly using a soft brush vacuum attachment or Synteko Microfiber Mop.
2. Mix 1-2 fl.oz. of Synteko Heavy Duty Soap in one gallon of water. Dip the Synteko mop pad into the mixture, wring thoroughly before cleaning the floor. Let the solution act for a few minutes, and then use a damp well wrung Synteko Microfiber Mop pad to thoroughly clean the floor.
3. Further clean with a solution of 10% vinegar in water. Let the floor completely dry. Heel marks and spots can be removed by treating the affected area with Synteko Heavy Duty Soap solution.
